Determined to change the industry to IT, I am constantly willing to develop and acquire new knowledge. I quickly learn technical issues and can effectively apply them in practice. Since I started learning, I have experienced great satisfaction from discovering new possibilities offered by the latest libraries and frameworks. This is an additional motivation for me to improve in this field. The most inspiring projects for me are those that make use of the potential of the latest technologies. I am particularly fascinated by creating working algorithms that solve problems.
